Joins SAPCA March 2026.

DOUG CREE DIRECTOR

DCLS are very proud to announce our membership of the highly respected Sports and Play Construction Association (SAPCA).

As a leading contractor in Sports Floodlighting Electrical Design & Installations, SAPCA requires stringent criteria for membership, including adherence to industry-leading standards in Electrical Installation, construction and service quality.

DC Lighting Services Ltd decision to join SAPCA underlines our unwavering commitment to excellence. With a track record of collaborating with SAPCA-affiliated companies and organisations on large-scale projects nationwide, becoming a full member was a natural progression.

By meeting SAPCA's rigorous standards, we aim to continue to elevate the quality and professionalism of Electrical Installation projects within Sports throughout the UK.

SAPCA membership is the latest accreditation for DC Lighting Services Ltd, to go with our accreditations with NICEIC, Avetta CDM Scope Contractor, Construction Line Gold

and Safe Contractor, ensuring we work well with all main contractor requirements and standards.

It all works to ensure that DC Lighting Services Ltd, clients and end users receive the highest quality products, services and ongoing maintenance for many years.

We now look forward to actively engaging within the SAPCA community and contributing to improving the safe operation of all electrical systems within the sports and play infrastructure across the UK.
